Loose cushions are necessary for enhanced comfort; quantity and dimensions depend on the selected product.
As an alternative, it is possible to use a back cushion shaped so as to adjust to the backrest of the seating pieces. It is a single element for the two-seater sofa and the deep sofa, divided into two parts for the three-seater.
The back cushion is designed to act partly as an armrest as well.
Back cushion: removable, in recycled and biodegradable polyester fibre, fixed foam covering in waterproofed polyester.
Back cushion upholstery: removable and available in the outdoor fabrics listed here below.
Notes:
As the weave in Twiggy cord lets part of the stainless steel structure at sight, both the structure and the base are available gloss varnished only and in the same colour.
This product can be used also in interior environments.
We advise to use a Winter Set protection cover.
