Naxos

design : CRS

This modular rug for exterior and interior environments is available in two versions and is created by joining loom woven strips with a width of 100 cm made of Twitape yarn.

The strips are sawn lengthwise with Punto Zigzag; other seams are executed widthwise with Punto Zigzag as decoration of the rug's surface.
They are positioned according to an alternated sequence in a pre-determined scheme.
Between the seams that join the woven elements, it is possible to insert a flat braid in Twitape yarn in the same color of the rug.
The number of strips varies according to the dimensions of the rug.
Both versions of Naxos, with or without the insertion of braids, are finished with a fringe all along the perimeter.
Only one mélange colour can be chosen.
