

Side tables for exterior environments available in three dimensions.
Structure: AISI 304 stainless steel matt varnished in grigio lava colour, plastic spacers.
Support surface: aluminium honeycomb matt varnished in a colour matching the structure.
Top: lava stone elements with and without glass décor.
Notes:
The material, the particular production process and the technique, the choice of each single recovered element composing the tops of Sciara side tables lead to an always different surface design. Irregularity, even dimensional, is the featuring characteristics of this production process.

These side tables are unique pieces, made by mixing elements recovered from previous productions according to an aesthetic criterion, which enhances every single component, and a conceptual one, which takes up the philosophy of “non-waste”, basis of the Mottainai collection.
The top is made by joining production elements that would otherwise remain unused; for this reason, it is possible to choose only the main shade.
This product can be used also in interior environments.

We advise to use a Winter Set protection cover.
