Sika

design : CRS

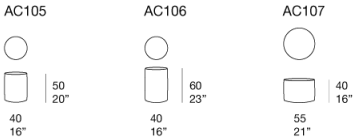

Series of baskets made completely by hand by sewing in a spiral-like pattern a cord in Rope yarn.

These baskets are unique pieces and mix cords in different colours left over from previous production, according to an aesthetic criterion, which enhances every single component, and a conceptual one, which takes up the philosophy of “non-waste” and makes them an integral part of the Mottainai collection.

Notes:

Due to the very nature of the product and the philosophy with which it was conceived, it is possible to choose only the main shade or to opt for a multicolour version that will be produced with what is available at the time of order.

This product can be used also in interior environments.
