Tajine

design : Ramos-Bassols, Nicolò Morales

Series of side tables with round top, removable and usable as a tray.

Base: AISI 316 stainless steel rod, matt varnished in grafite colour. Plastic spacers.
Top: hand-decorated moulded ceramic.

The ceramic top is modeled and then decorated by hand with exclusive colours by Nicolò Morales.

Notes:
The material, the particular handwork and the production technique used for the top of Tajine side tables lead to colour and design differences between tables, even from the same batch and typology. The irregularity and the uniqueness of each item are sought after and are the featuring characteristics of this series.

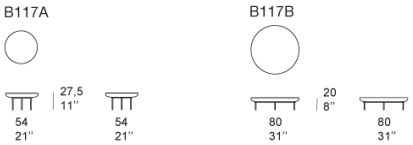

This product can be used also in interior environments.

We advise to use the Winter Set protection cover.
