Toku

design : Vincent Van Duysen

Side tables with top in wood or covered with fabric.
Toku series also includes shading structures made of wood and fabric available in two dimensions, a sun bed, benches and trays.

Structure: cedar heartwood, adjustable plastic material feet.

Top:
- cedar heartwood slats
- marine plywood, internal fixed cover in three-dimensional polyester fabric.

Marine plywood upholstery: fixed and available in Wara fabric.

Notes:
The structure in cedar heartwood is treated with a natural impregnating product.

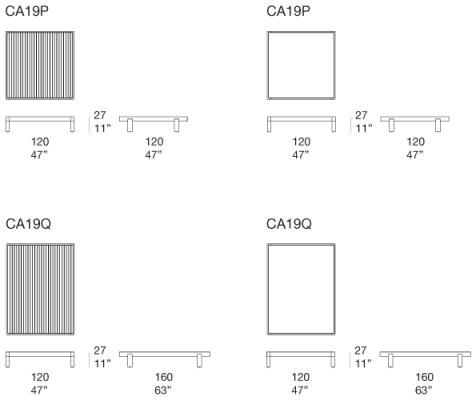

We advise to use a Winter Set protection cover for the upholstered version only.

For this product featuring a top in wooden slats, the use of the Winter Set protection usually proposed for products intended for outdoor use is not recommended. The use of the Winter Set could create a humid environment, with no air recycling, which could consequently generate damage to the material. As to maintain the product at its best, it is also recommended to always dry the top after prolonged exposure to heavy rain or high humidity.
