Zoe

design : CRS

Zoe is a rug for exterior and interior environments created with a one-, two-colour or mélange cord.

This rug is available in three versions.

version 1
This version is created by sewing together 30 x 30 cm modules.
The cord is winded up in spiral-like designs which are then sewn with a non-orthogonal positioning which creates a geometric pattern on the rug's extremities.
Only one colour can be chosen among the ones in the Rope or Aquatech cords ranges.

version 2
This version is created by sewing together 30 x 30 cm modules.
The cord is winded up in spiral-like designs which are then sewn with an orthogonal placement.
In the spaces between the modules, handmade designs are inserted, which adapt to the size of the spaces and thus assume different shapes.
Two colours can be chosen: the colour of the modules and the colour of the design, among the ones in the Rope or Aquatech cords ranges.

version 3
This version consists of a single round element which is created by winding up the cord.
Only one colour can be chosen among the ones in the Rope, Aquatech, Moss or Twiggy cords ranges.

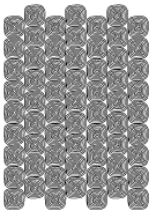

This last version can be also produced with a contrasting border: two colours can be chosen for Rope, Aquatech or Twiggy cord.
Upon request, it is possible to create rugs joining round modules with custom dimensions into personalized configurations.
