Seki-Han Suspension

Designed by Tobia Scarpa, 2025

LED retrofit - 22W - 2700K - CRI> 80

Suspension lamp emitting direct and indirect light with symmetrical and asymmetrical distribution. Features two horizontal ash wood blades joined by chromed metal fittings. Blades rotate around a central tubular light source to allow variable light emission. Custom-developed dimmable linear LED light source. The lamp can also be fitted with standard T8 LED tubes. Designed by Tobia Scarpa in 1963 and reissued in 2025, Seki-Han is testament to his mastery of design and wood-working expertise. The intricate construction draws on naval techniques to shape two wooden blades that now rotate around the light source, leaving a slender sliver of light visible at all times for a highly poetic effect. The re-edition also introduces an elegant suspension model, identical in design but with a slightly shorter body. In both versions, Seki-Han is a living presence where the immateriality of light meets the tactility of wood.
