

Materialism Quartz Wax Diffuser

The refined and musky aromas of ambrette and pink pepper are contained in strange milky translucent glass. Each vessel is made from a gob of glass, pulled, pressed and stretched into an unexpectedly complex and unique container.

PROCESS	Mouth blown into a metal mould to create surface texture, white paint is applied directly to the mould which is picked up by the glass through the blowing process. A metallic decal is applied on the base to finish. Wax is a natural soy and paraffin mix. Scent will last for approximately 4-6 weeks.
