## EASY CHAIR

design Jun Kamahara

2019

The JK Easy Chair is composed by a thin tubular frame in stainless steel supporting a deep leather seat. The backrest is made of leather strips padded with large cushions, which have been specifically designed to delicately host the person's hips and provide a comfortable support for the back. The comfort granted by this chair is almost surprising considering the highly graphic appearance of the object. All the materials and finishes have been chosen for their capacity to become more beautiful season after season and acquire the famous "glaze of time" (furubi in Japanese).
